**Subject:** Microsoft Settlement

The proposed settlement is ridiculously lenient. It seems like people keep forgetting that Microsoft was found GUILTY, GUILTY, GUILTY, and that the verdict was AFFIRMED by the appeals court. All that is at issue now is their punishment. Letting them off with the proposed slap on the wrist would be a travesty, and would irreparably harm the entire computer industry.

Microsoft must be punished severely. Their monopolistic and predatory practices must be slapped down HARD so that this time they won't come back in a few years and start pulling the same tricks. Please don't cave in. Make this criminal corporation feel the pain of justice.
